LIFE SAVING SAFETY RULES

Work only with a valid **Work Permit** wherever required. Identify hazards, assess risks through a Job Safety Analysis (JSA) and implement required controls before starting work.

Use a **vehicle fit for the purpose** and drive safely. Always wear a **seat belt** (4 wheelers) and **crash helmet** (2 wheelers). Never use mobile phone while driving and always comply with speed limits and traffic rules.

Do not work or drive **under the influence of alcohol and drugs.** Do not smoke or sleep at the workplace.

Never place yourself in the **line of fire** of rotating machinery, moving equipment, or uncontrolled energy. Ensure **machine guards** as per design are in place before operating equipment to prevent human contact or any loose apparel to come in contact with rotating equipment.

Verify **energy isolation process (LOTOTO - Lockout Tagout Tryout)** prior to commencing any maintenance or servicing work in which the unexpected energization or startup of the machines or equipment, or release of all type of stored energies may occur. Deploy proper work permit to land safe deployment.

Perform lifting operations only with an **approved lift plan,** use fit-for-purpose lifting equipment and accessories, and competent authorized personnel. Ensure no person shall work under the **suspended loads.**

Protect yourself from falls while ascending, descending or **working at height** (≥ 1.8 meters) by using approved fall prevention or protection systems.

Obtain written authorization, conduct gas testing and ensure safe atmosphere before entering into a **Confined Space.**

Never disable, override, or bypass safety **SOPs, safety-critical equipment** or exceed safe operating limits without written authorization.

Remove ignition hazards, obtain authorization, and maintain an effective fire watch before, during, and after hot work activities.
